

Air Conditioning & Heating

PRODUCT SPECIFICATIONS

95%/93% AFUE

HEATING INPUT: 46,000-115,000 BTU/h

Online registration is required within 60 days of installation.

GMH95/GCH9

Multi-Position, Dual\$avertm Convertible, Multi-Speed Gas Firnace

The Goodman® GMH95/GCH9 95%/93% AFUE Dual\$aver™ Convertible, Multi-Speed, Multi-Position furnaces feature a patented aluminized-steel tubular heat exchanger and durable Silicon Nitride Hot Surface Ignition system.

Standard Features

- Patented TuffTube[™] dual-diameter tubular heat exchanger with lifetime limited warranty plus 10-year limited furnace replacement warranty
- Two-stage gas valve with revolutionary new convertible technology that allows installer to activate the two-stage valve with the flip of a dipswitch
- Silicon Nitride igniter with patented adaptive learning control for maximum igniter life
- Furnace control board with self-diagnostics, color-coded low-voltage terminals, and provisions for electronic air cleaner and 24-volt humidifiers
- Control board stores the last five diagnostic codes in memory; simple push-button activation outputs the fault history to a flashing red LED
- Low constant fan allows homeowner to activate the low heat speed to efficiently circulate air throughout the home.
- Self-adjusting feature automatically adjusts to high or low stage based on outside temperature without an outdoor temperature sensor
- Dual-certified for sealed combustion direct vent (2-pipe) or non-direct vent (1-pipe) applications
- Easy-to-install top venting is standard; alternate flue/vent located on the right (GMH95)
- All models comply with California NOx emissions standards

Cabinet Features

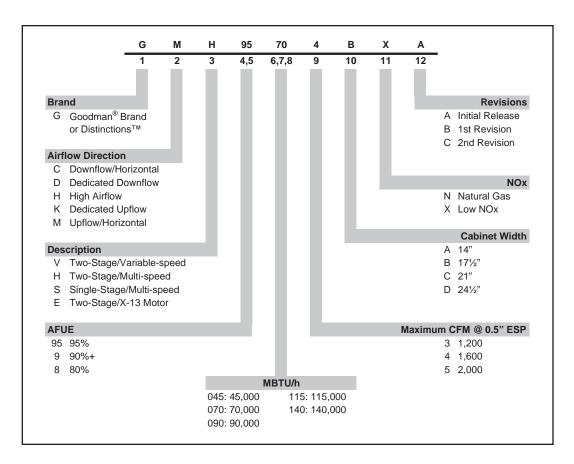

- Fully insulated, heavy-gauge steel cabinet with durable baked-enamel finish
- Foil-faced insulation lines the heat exchanger
- Designed for multi-position installation GMH95: upflow, horizontal left or right; GCH9: downflow, horizontal left or right
- Airtight solid bottom for side-return applications and easycut tabs for effortless removal in bottom air inlet applications
- Convenient left or right connection for gas & electric service
- Coil and furnace fit flush for most installations

| Ship Weight (lbs) | 132 | 135 | 136 | 158 | 172 | 175 |

- 1- Natural Gas BTU/h. For altitudes above 2,000', reduce input rating 4% for each 1,000' above sea level. Low-fire rate is 75% of high-fire rate
- 2- DOE AFUE based upon Isolated Combustion System (ICS)
- 3– Vent and combustion air diameters may vary depending upon vent length. Refer to the latest editions of the National Fuel Gas Code NFPA 54/ANSI Z223.1 (in the USA) and the Canada National Standard of Canada, CAN/CSA B149.1 and CAN/CSA B142.2 (in Canada).
- 4- Permanent air filter size is based on 600 FPM velocity. Check with filter manufacturer for specific details.
- 5– Minimum Circuit Ampacity = (1.25 x Circulator Blower Amps) + ID Blower amps. Wire size should be determined in accordance with National Electrical Codes. Extensive wire runs will require larger wire sizes.
- 6- Maximum Overcurrent Protection Device refers to maximum recommended fuse or circuit breaker size. Must use fuses or HACR-type circuit breakers of the same size as noted.

- · All furnaces are manufactured for use on 115 VAC, 60 Hz, single-phase electrical supply.
- Gas Service Connection 1/2" FPT
- Important: Size fuses and wires properly and make electrical connections in accordance with the National Electrical Code and/or all existing local codes.

GMH95 Dimensions

| Model | Α | В | С | D | E |
|--------------|------|------|--------|--------|--------|
| GMH950453BXA | 17½" | 16" | 131⁄8" | 121/8" | 13⁵⁄8" |
| GMH950703BXA | 17½" | 16" | 131⁄8" | 121/8" | 13⁵⁄8" |
| GMH950704CXA | 21" | 19½" | 16½" | 16" | 17½" |
| GMH950904CXA | 21" | 19½" | 16½" | 16" | 17½" |
| GMH950905DXA | 24½" | 23" | 205/8" | 19%" | 201/8" |
| GMH951155DXA | 24½" | 23" | 205/8" | 19%" | 201/8" |

Notes

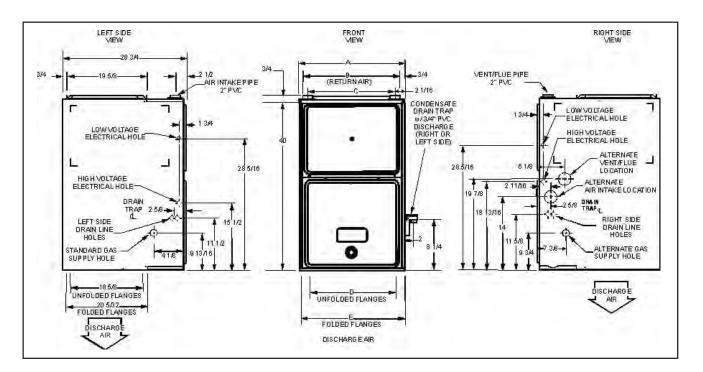

- Installer must supply one or two PVC pipes: one for combustion air (optional) and one for the flue outlet (required). Vent pipe must be either 2" or 3" in diameter, depending upon furnace input, number of elbows, length of run, and installation (1 or 2 pipes). The optional combustion air pipe is dependent on installation/code requirements and must be 2" or 3" diameter PVC.
- · Line voltage wiring can enter through the right or left side of furnace. Low-voltage wiring can enter through the right or left side of furnace.
- · Conversion kits for high-altitude natural gas operation are available. Contact your Goodman distributor or dealer for details.
- Installer must supply the following gas line fittings, according to which entrance is used:
 Left: One 90° street elbow; one 2½" pipe nipple; one 90° elbow; straight pipe; one ground joint union
 Right: Straight pipe to reach gas valve
- Installations using a bottom return: Failure to unfold duct flanges will reduce airflow area by approximately 18%. This could result in performance and noise issues.

MINIMUM CLEARANCES TO COMBUSTIBLE MATERIALS

| Position | Sides | Rear | Front | Bottom | Flue | Тор |
|------------|-------|------|-------|--------|------|-----|
| Upflow | 0" | 0" | 1" | С | 0" | 1" |
| Horizontal | 6" | 0" | 1" | С | 0" | 4" |

- C = If placed on combustible floor, the floor MUST be wood ONLY.
- For servicing or cleaning, a 24" front clearance is recommended.
- · Unit connections (electrical, flue, and drain) may necessitate greater clearances than the minimum clearances listed above.
- In all cases, accessibility clearance must take precedence over clearances from the enclosure where accessibility clearances are greater.
- Approved for line contact in the horizontal position

GCH9 DIMENSIONS

| Model | Α | В | С | D | E |
|-------------|------|------|------|------|------|
| GCH90453BXA | 17½" | 16" | 12¾" | 14½" | 16" |
| GCH90703BXA | 17½" | 16" | 12¾" | 14½" | 16" |
| GCH90704CXA | 21" | 19½" | 16%" | 18" | 19½" |
| GCH90904CXA | 21" | 19½" | 16%" | 18" | 19½" |
| GCH90905DXA | 24½" | 23" | 20%" | 21½" | 23" |
| GCH91155DXA | 24½" | 23" | 20%" | 21½" | 23" |

Notes:

- Installer must supply one or two PVC pipes: one for combustion air (optional) and one for the flue outlet (required). Vent pipe must be either 2" or 3" in diameter, depending upon furnace input, number of elbows, length of run, and installation (1 or 2 pipes). The optional combustion air pipe is dependent on installation/code requirements and must be 2" or 3" diameter PVC.
- Line voltage wiring can enter through the right or left side of furnace. Low-voltage wiring can enter through the right or left side of furnace.
- · Conversion kits for high-altitude natural gas operation are available. Contact your Goodman distributor or dealer for details.
- Installer must supply the following gas line fittings, according to which entrance is used:
- Left: One 90° street elbow; one 2½" pipe nipple; one 90° elbow; straight pipe; one ground joint union Right: Straight pipe to reach gas valve
- Installations using a bottom return: Failure to unfold duct flanges will reduce airflow area by approximately 18%. This could result in performance and noise issues.

MINIMUM CLEARANCES TO COMBUSTIBLE MATERIALS

| Position | Sides | Rear | Front | Bottom | Flue | Тор |
|------------|-------|------|-------|--------|------|-----|
| Downflow | 0" | 0" | 1" | NC | 0" | 1" |
| Horizontal | 6" | 0" | 1" | С | 0" | 4" |

C = Combustible: If placed on combustible floor, the floor MUST be wood ONLY.

NC = Non-Combustible: A combustible floor sub-base must be used for installation on combustible flooring

Notes:

6

- · For servicing or cleaning, a 24" front clearance is recommended.
- Unit connections (electrical, flue and drain) may necessitate greater clearances than the minimum clearances listed below.
- In all cases, accessibility clearance must take precedence over clearances from the enclosure where accessibility clearances are greater.

- CFM in chart is without filter(s). Filters do not ship with this furnace, but must be provided by the installer.
- All furnaces ship as high-speed cooling and medium-speed heating. Installer must adjust blower cooling & heating speed as needed.
- For most applications, about 400 CFM per ton when cooling is desirable.
- INSTALLATION IS TO BE ADJUSTED TO OBTAIN TEMPERATURE RISE WITHIN THE RANGE SPECIFIED ON THE RATING PLATE.
- The chart is for information only. For satisfactory operation, external static pressure should not exceed value shown on the rating plate. The shaded area indicates ranges in excess of the recommended maximum heating static pressure.
- The above chart is for furnaces installed at 0-2000 feet. At higher altitudes, a properly de-rated unit will have approximately the same temperature rise at a particular CFM, while ESP at the CFM will be lower.

- CFM in chart is without filter(s). Filters do not ship with this furnace, but must be provided by the installer. If the furnace requires two return filters, this chart assumes both filters are installed.
- · All furnaces ship as high-speed cooling and medium-speed heating. Installer must adjust blower cooling & heating speed as needed.
- For most jobs, about 400 CFM per ton when cooling is desirable.
- INSTALLATION IS TO BE ADJUSTED TO OBTAIN TEMPERATURE RISE WITHIN THE RANGE SPECIFIED ON THE RATING PLATE.
- The chart is for information only. For satisfactory operation, external static pressure should not exceed value shown on the rating plate. The shaded area indicates ranges in excess of the recommended maximum heating static pressure.
- The above chart is for U.S. furnaces installed at 0-2000 feet. At higher altitudes, a properly de-rated unit will have approximately the same temperature rise at a particular CFM, while ESP at the CFM will be lower.

GCH9 Blower Performance Specifications (cont.)

GMH95 Wiring Diagram

Wiring is subject to change. Always refer to the wiring diagram on the unit for the most up-to-date wiring.

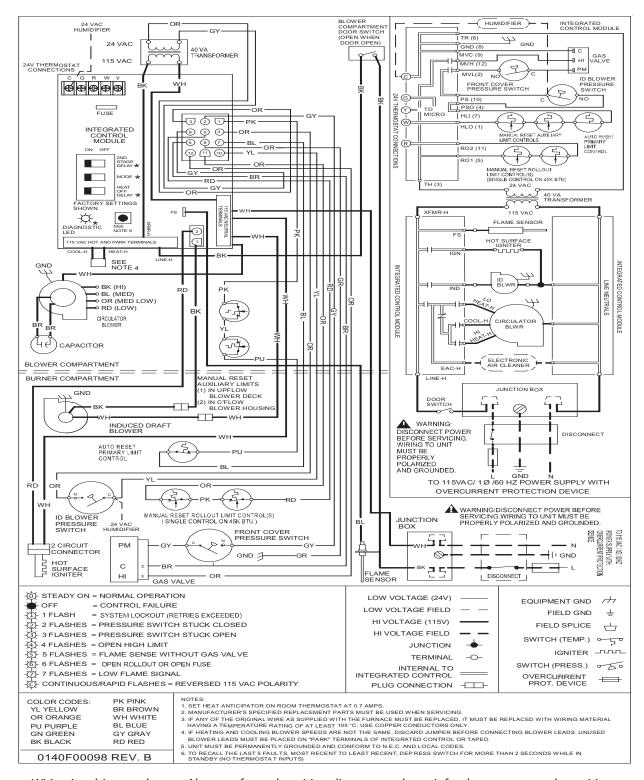

High Voltage:

Disconnect all power before servicing or installing this unit. Multiple power sources may be present. Failure to do so may cause property damage, personal injury, or death.

- All installations above 7,000' require a pressure switch change. For installation in Canada, furnaces are certified only to 4,500'.
- **Downflow Floor base:** When the GCH9 model is installed directly on a wood floor, a downflow floor base must be used. Those model numbers are: CFB17, CFB21 and CFB24.
